

KnowledgePortal

Sharing SME proven tools is highly demanded by coaches and KAMs.
The KnowledgePortal aims to address this request.

It includes the following key features:

Context sensitive knowledge search.

Knowledge in forms of tools, methods, practice examples or didactical materials can be identified via multi-criteria search and/or via context sensitive search.

Large tool box.

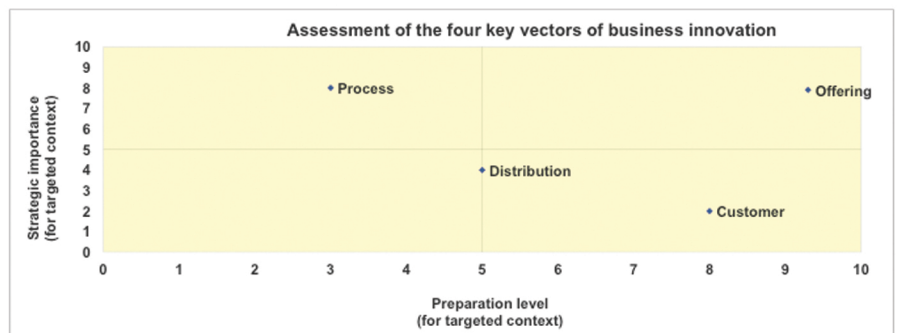

The newest versions of the smE-MPOWER tool box are accessible.
Other coaching organisations, such as SME Instrument, JIC and platinn are committed to share their knowledge base on the KnowledgePortal.

Reference Coaching services.

smE-MPOWER provides four reference coaching services: Business coaching, Organisation & Resource coaching, Cooperation coaching, and Finance coaching.
The individual steps of the coaching services are documented with tools and other didactical materials.

Host configurator.

Each coaching organisation can assign their users and roles.

Example: extract of needs analysis results (Business Innovation Roadmap Tool)

"The KnowledgePortal has become my number one source of relevant information for coaching. The resources and tools that I have found there have significantly contributed to improve my work and to provide a better service to my SME clients. It is also a superb platform for knowledge exchange and sharing with my peers Europe wide."

- Fernando Aguirre
Partner at Hasten Ventures
